U.S. Department of Housing and Urban Development

Housing Information Portal (HIP)

HUD-50058 and HUD-50058 MTW Expansion

Technical Reference Guide (TRG)

October 2022

Table of Contents

1.0 Purpose and Background

The US Department of Housing and Urban Development (HUD) is modernizing the Office of Public and Indian Housing (PIH) Inventory Management System/Public Housing Information Center (IMS/PIC) to provide a better user experience for Public Housing Authorities (PHAs) and to significantly enhance the collection, use, and analysis of both building and unit and household data through newer technology. HUD PIH uses this data for all its core business functions including, but not limited to, compliance with laws and regulations, calculating subsidies across its programs, income verification, maintaining public housing inventory data used for inspections, and evaluating program performance.

The new Housing Information Portal (HIP) system will eventually replace, enhance, and augment the functionality currently performed by IMS/PIC, while reducing the administrative burden on PHAs for providing information to HUD through a new form/data submission mechanism. The enhanced technology used by the HIP system will also enable critical new policy initiatives, including the expansion of the Moving to Work (MTW Expansion) program mandated by the 2016 Consolidated Appropriations Act and several programmatic changes resulting from the Housing Opportunities Through Modernization Act of 2016 (HOTMA).

The purpose of this HIP Technical Resource Guide (TRG) is to assist PHAs, including both non-MTW PHAs and MTW Expansion PHAs, and these agencies' business partners and software vendors to use the HIP system successfully. The TRG provides detailed information and instructions for how PHAs electronically submit data required by the HUD-50058 and the new HUD-50058 MTW Expansion form and the correct format for transmitting this data to HUD[1]. Unlike IMS/PIC, which primarily required PHAs to submit a text file in a prescribed American Standard Code for Information Interchange (ASCII) format, HIP uses a newer, widely utilized Java Script Object Notation (JSON) format.

The new format will allow PHAs and these PHAs' vendors to submit 50058 data more seamlessly to the HIP system.

The TRG also provides information on changes to existing data elements, including new and eliminated data on the HUD-50058 MTW Expansion form, edit checks and error codes organized by the fields on the form, and other information such as submitting questions to HUD. One particular item of note is that the HIP system will establish a real estate identifier for each unit, building and development in the public housing program. The HIP system will continue to recognize the traditional composite key (development number, building number, building entrance number, and unit number combination) used to identify parts of the public housing inventory in IMS/PIC, but in time PIH plans to transition away from using the composite key to relying on real estate identifiers instead. The HUD-50058 MTW Expansion contains the Unit Real Estate ID Number on line 1h. This change will lead to better data integrity and easier

---

[1] Support for the HUD-50058 MTW, utilized by the initial 39 MTW PHAs that were designated as MTW prior to 2015, will be developed in a future system release.

tracking of inventory if it transitions to another program (e.g. from public housing to RAD PBV). Once a PHA has transitioned from using IMS/PIC to the HIP system, they will be able to obtain the real estate IDs for their inventory.

It should be noted that although the HIP system will first accommodate the MTW Expansion PHAs, these PHAs in certain situations may still utilize the HUD-50058, therefore both forms will be supported in the system. This TRG contains information on the technical implementation of both forms and where there are differences those are noted. Those differences may include a line (data element) only being on one of the forms. In other instances, it may include how flexibilities specific to the MTW Expansion PHAs will be handled by relaxing or removing error messages using a functionality called "flex buckets". The flex buckets will allow us to relax or remove a specific error code for a specific cohort, submission type, and/or program type as needed. This allows us to use the same set of error messages for both forms, but also allow for the fact that not all MTW Expansion PHAs will utilize the same flexibilities.

Details regarding how each PHA will transition from using IMS/PIC to the HIP system and the associated data migration will be forthcoming once it is finalized. Once the PHA has transitioned to the HIP system, it will then stop submitting data changes in IMS/PIC and instead submit them to the HIP system.

The TRG will continue to be updated throughout the ongoing development of the HIP system.

2.0 Summary

The MTW Expansion TRG contains the following information:

- Section 3.0: Questions & Reference Materials
- Section 4.0 Form HUD-50058 MTW Expansion summary and System of Records Notice (SORN)
- Section 5.0: Changes included in Form HUD-50058 MTW Expansion including new and deleted fields
- Section 6.0: Summary of JSON format and JSON Mapping
- Section 7.0: Transmission and validation of information via JSON
- Section 8.0: HUD-50058/HUD-50058 MTW Expansion Line Technical Reference Summary
- Section 9.0: HUD-50058/HUD-50058 MTW Expansion Line Sections and Fields

3.0 Questions & Reference Materials

TRG users, including PHA staff and software developers, may submit their questions regarding TRG content to: HUDITVendorComms@hud.gov. Questions should reference that they are about the TRG. HUD regularly monitors this mailbox. **Policy questions should not be sent to this mailbox.**

Policy questions:

- You may contact your local HUD field office with general questions relating to the Public Housing and Housing Choice Voucher programs.
- MTW Expansion policy questions can be directed to the mtw-info@hud.gov mailbox and will be answered once MTW office staff have been able to examine them.

PHAs and agency business partners and vendors participating in or interested in MTW Expansion should also review several reference materials posted to HUD's MTW Expansion webpage for more information.

4.0 HUD-50058 and HUD-50058 MTW Expansion Summary & System of Records Notice

The HUD-50058 and HUD-50058 MTW Expansion collects information about residents who live in public and assisted housing, including these programs in PHAs that are designated as MTW through the MTW Expansion program. Per the form, the collection of this information is authorized by the U.S. Housing Act of 1937 (42 U.S.C. 1437 et seq.), Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) and by the Fair Housing Act (42 U.S.C. 3601-19) and the information requested is required to obtain or retain benefits. HUD is authorized to collect this information under the Housing and Community Development Act of 1987 42 U.S.C. 3543 (a). The purpose of this information collection is to:

- Analyze assisted housing programs;
- Determine the occupancy level of public housing and calculate the operating subsidy in accordance with 24 CFR 990;
- Permit PHAs to monitor their own reporting to identify favorable and unfavorable trends;
- Monitor PHAs and participants for compliance with program regulations and requirements;
- Fraud detection and prevention via rent/income monitoring;
- Housing inventory and development of program initiatives with emphasis on the housing of special needs groups; and
- Make available accurate demographic information depicting tenant characteristics to Congress and other interested parties.

HUD will also be publishing a new System of Records Notice (SORN) that further details how data collected through the HIP system is used in the legal operation of HUD PIH rental housing

assistance programs including income matching with the Social Security Administration and other agencies.

5.0 Changes Included in Form HUD-50058 Moving to Work Expansion

Consistent with the 2016 Consolidated Appropriations Act and implementing regulation, HUD must collect some new information in support of the MTW Expansion effort including new outcome data for households that end their participation in HUD programs. This outcome data will help HUD and oversight stakeholders evaluate the efficacy of the MTW program in helping households achieve self-sufficiency.

The new HUD-50058 MTW Expansion is a derivative of the HUD-50058. In large part the data elements (lines) on the new form remain unchanged from the HUD-50058. Some of the notable changes to the new form include that it requires PHAs to submit the reasons for why it conducts an interim reexamination of household income including rent hardship requests and stepped rents. Other changes eliminate obsolete data elements (e.g. information pertaining to the inactive Welfare to Work program. The following table provides the most notable changes to the HUD-50058 MTW Expansion as compared to the HUD-50058 and should not be considered exhaustive. Changes to any error codes, including actions that will be taken by the flex buckets, are detailed in Section 11.0 HUD-50058/HUD-50058 MTW Expansion Line Sections and Fields.

Table 5.1 Notable Changes from the HUD-50058 to the HUD-50058 MTW Expansion

The items listed here only appear on the HUD-50058 MTW Expansion. Whether any of the non-MTW specific changes (e.g., line 1h or removal of Welfare to Work) will appear on a future revision of the HUD-50058 has not been determined at this time.

Line Number/ Section	Summary of Change
1c	Program type CE has been removed since the Certificate program no longer exists. Updated program codes for the voucher program to separate them instead of all being included under VO. Added Local, Non-Traditional program codes that could be used by MTW Expansion PHAs.
1h	A new Unit Real Estate ID Number has been established in HIP, which is set by the system for the unit. This change will apply to Public Housing only when first implemented; but may be used for other programs in the future. This change will allow PHAs and software vendors to shift from the conventional composite key (development number, building number, building entrance number, and unit number) to a real estate identification number.
2w	Line 2w, End of Participation reasons (only if 2a = End Participation), was added for PHAs to indicate the reason the family ended their participation in the program. This will assist with the tracking the reasons why households leave the HUD PIH assisted rental housing program designated on the form
2x	Line 2x, Interim Reexamination reasons (only if 2a = Interim Reexamination), was added to allow PHAs to indicate the reason there has been a change to the family's information at a time other than a full reexamination or change of unit.

Line Number/ Section	Summary of Change
3r	Line 3r, Average number of hours worked per week, was added to allow PHAs to report the average number of hours worked per week, over the past year. This will assist with collecting information about work requirements.
3s	Line 3s, Work requirement compliance, was added to allow PHAs to state to what extent the household is in compliance with the PHA's work requirements policy, if applicable. This will assist with collecting information about work requirements.
4f	Line 4f was removed due to Welfare to Work being a defunct program
5i	Line 5i, Date of last HQS inspection, was updated to remove the word "annual" from the line description since PHAs may perform inspections at intervals other than annual (e.g. biennial).
7h	Line 7h, Prior year or current year/anticipated income, replaces line 7h, Reserved, that is currently on the Form-50058 that the majority of PHAs use. This line was added to capture whether a PHA is reporting prior year or current year/anticipated income for the household. The prior year provision is in the Housing Opportunity Through Modernization Act of 2016 (HOTMA).
Section 8	The title of Section 8 of the form was changed from "Expected Income Per Year" to "Deductions and Allowances" to better reflect the content of the section. This change is cosmetic and does not affect submission of data to the PIH Information Center (PIC).
8u	Line 8u, Deductions and allowances not reflected above, was added to the form so PHAs can report the total amount of deductions and allowances not reflected on other lines in this section changed to clarify that it will capture any deductions and allowances not captured on other lines above this line in this section.
8x	Line 8x, Total allowances, was updated to reflect that line 8u will be included in the calculation to determine the value for this line.
10c	Line 10c, Ceiling Rent, was removed from the form since ceiling rent is no longer used.
10d	Line 10d, Lower of TTP or flat rent, was updated to remove the reference to ceiling rent and replace it with flat rent.
10u	Line 10u, Type of rent selected, was updated to include over-income rent and MTW specific alternate rent types. The MTW specific alternate rent types are per the MTW Operations Notice.
10v	Line 10v, Date over-income family exceeded the two-year grace period, was added to the form so PHAs can indicate the date an over-income family exceeded the two-year grace period outlined in Housing Opportunity Through Modernization Act of 2016 (HOTMA) and related guidance.
10w	Line 10w, Alternate tenant rent, was added to the form so PHAs can report the rent amount the family pays when an alternate type of rent is selected in line 10u.
11u	Line 11u, MTW specific alternate rent type, was added to the form so PHAs can report which MTW specific alternate rent type, per the MTW Operations Notice, the household's rent is determined by if the household's rent is not calculated using the standard rent calculation detailed on the form.
11v	Line 11v, Alternate HAP to owner, added to the form so PHAs can report the total Housing Assistance Payment (HAP) by paid to the unit owner if the household's rent is calculated using one of the alternate rent types on line 11u. Will also be used if the household is a participant in the Local, Non-Traditional Property-Based program since this program does not typically use the standard rent calculation as stated on the form.
11w	Line 11w, Alternate tenant rent, was added to the form so PHAs can report the tenant rent to owner determined by the PHA if the household's rent is one of the MTW specific alternate rent types on line 11u. Will also be used if the household is a participant in the Local, Non-Traditional Property-Based program since this program does not typically use the standard rent calculation as stated on the form.

Line Number/ Section	Summary of Change
11ap	Line 11ap, MTW specific alternate rent type, was added to the form so PHAs can report which MTW specific alternate rent type the household's rent is determined by if the household's rent is not calculated using the standard prorated rent calculation detailed on the form.
11aq	Line 11ap, Alternate prorated HAP to owner, was added to the form so PHAs can report the total prorated Housing Assistance Payment (HAP) by paid to the unit owner if the household's rent is calculated using one of the alternate rent types on line 11ap. Will also be used if the household is a participant in the Local, Non-Traditional Property-Based program since this program does not typically use the standard rent calculation as stated on the form.
11ar	Line 11ar, Alternate prorated tenant rent, added to the form so PHAs can report the prorated tenant rent to owner determined by the PHA if the household's rent is one of the MTW specific alternate rent types on line 11ap. Will also be used if the household is a participant in the Local, Non-Traditional Property-Based program since this program does not typically use the standard prorated rent calculation as stated on the form.
12x,	Line 12x, MTW specific alternate rent type, added to the form so PHAs can report which MTW specific alternate rent type, per the MTW Operations Notice, the household's rent is determined by if the household's rent is not calculated using the standard rent calculation detailed on the form.
12y	Line 12y, Alternate HAP to owner, added to the form so PHAs can report the total Housing Assistance Payment (HAP) by paid to the unit owner if the household's rent is calculated using one of the alternate rent types on line 12x. Will also be used if the household is a participant in the Local, Non-Traditional Tenant-Based program since this program does not typically use the standard rent calculation as stated on the form.
12z	Line 12z, Alternate tenant rent, added to the form so PHAs can report the tenant rent to owner determined by the PHA if the household's rent is one of the MTW specific alternate rent types on line 12x. Will also be used if the household is a participant in the Local, Non-Traditional Tenant-Based program since this program does not typically use the standard rent calculation as stated on the form.
12ak	Line 12ak, MTW specific alternate rent type, was added to the form so PHAs can report which MTW specific alternate rent type the household's rent is determined by if the household's rent is not calculated using the standard prorated rent calculation detailed on the form.
12am	Line 12am, Alternate prorated HAP to owner, was added to the form so PHAs can report the total prorated Housing Assistance Payment (HAP) by paid to the unit owner if the household's rent is calculated using one of the alternate rent types on line 12ak. Will also be used if the household is a participant in the Local, Non-Traditional Tenant-Based program since this program does not typically use the standard rent calculation as stated on the form
12an	Line 12an, Alternate prorated tenant rent, added to the form so PHAs can report the prorated tenant rent to owner determined by the PHA if the household's rent is one of the MTW specific alternate rent types on line 12ak. Will also be used if the household is a participant in the Local, Non-Traditional Tenant-Based program since this program does not typically use the standard prorated rent calculation as stated on the form.
12ap	Line 12ap, Additional financial support for tenant-based voucher family, was added to the form so PHAs can report the total financial assistance provided by the PHA to a household when the household is leasing a new TBV unit.
12aq	Line 12aq, Financial incentive for property owner, was added to the form so PHAs can report the total financial assistance provided by the PHA to the landlord when a household is leasing a new TBV unit.

Line Number/ Section	Summary of Change
Section 17	Multiple changes were made to this section: • The title of Section 8 of the form was changed from "Family Self-Sufficiency (FSS)/Welfare to Work (WtW) Voucher Addendum" to "Family Self-Sufficiency (FSS)/MTW Self-Sufficiency" to reflect the updated content in the section. • All references to WtW were removed • Lines 17e-17g and 17n are now used for MTW self-sufficiency reporting • Line 17i was updated to only be for FSS • Lines 17p-17r were added for MTW self-sufficiency reporting

6.0 Summary of Submission File Format

The HIP system will accept submissions using Java Script Object Notation (JSON). Additional information on the JSON submission, including the JSON Mapping file (MS-Excel), sample JSON files, and other technical information, can be found on the Housing Information Portal Technical Information page. Section 11.0 provides references to the corresponding JSON mapping for each field on the HUD-50058 and HUD-50058 MTW Expansion forms.

Information about the Java Script Object Notation (JSON) format: https://www.json.org/json-en.html

7.0 Transmission and validation of information via JSON

Moving forward, to provide information to the HIP system, PHAs and software vendors are required to submit their information in JSON format. Once HUD receives the JSON formatted data, the information will be validated and the vendor will be sent notification through its 50058 reporting and submission software that the information has been received, along with errors discerned during the validations. Once the PHA and/or software vendor resolves any issues, the PHA and/or software vendor can resubmit the PHA's 50058 information using JSON.

8.0 Bulk Form Submissions

Users will be able to submit multiple 50058s in a single JSON file submission. Sometimes this may be referred to as a bulk form submission. This will be done through the API submission. Below are additional details including the bulk form submission request format and the request submission response.

```json
{
    "form50058": [
    {
    "header": {
    "submissionType": "MTWEX",
    "identificationCode":"F01"
    },
    …
    },
    {
    "header": {
    "submissionType": "50058",
    "identificationCode":"F02"
    },
    …
    }
    ]
    }
```

Request Submission Response:

1. Change the request type to GET request in your API connection
2. Replace the Job Id in below code
3. Sample response can be found below

https://hud--stg.my.salesforce.com/services/data/v53.0/query/?q=select+name,Identification_Code__c,Status__c,Program__c,Correction__c,Type_of_Action__c,Head_of_Household_Name__c,(SELECT+Status_Code__c,Error_Type__c,Subject__c,+Field_Reference__c+FROM+Log_Entries__r)+from+Form_Submission__c+where+job_id__c='7073500001XI0MrAAJ'
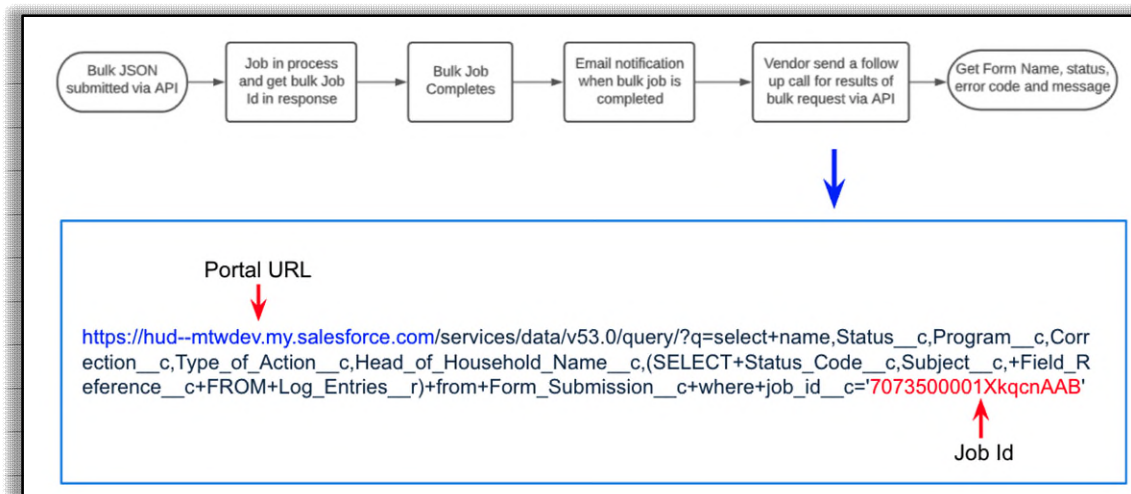

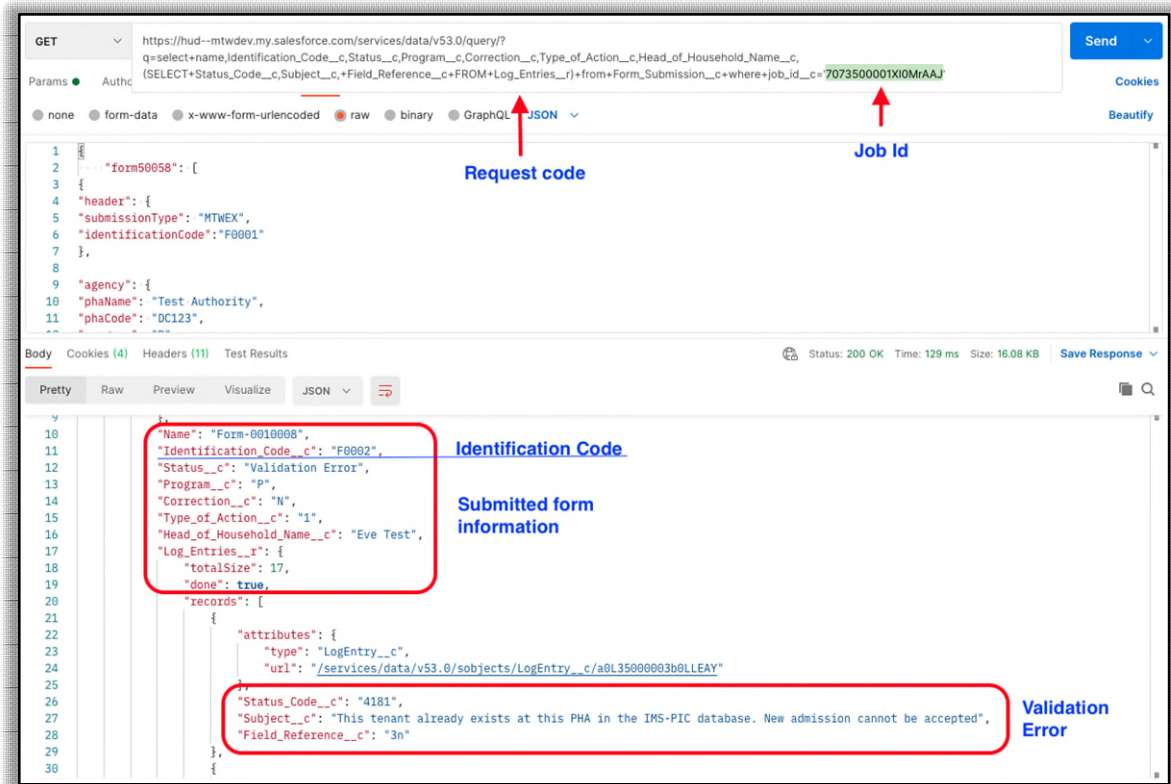

9.0 Processing of Corrections and Voids

To improve data quality and user experience, some changes are being made to how corrections and voids to previously submitted 50058 records are being handled.

9.1 Corrections

Users will have the ability to correct any form, not just the most recently submitted form. To facilitate this, the form name from within the system will need to be supplied in the "formName" attribute in the JSON file. Corrections will need to pass the validation process to successfully correct the specified form. If the JSON submission passes validation, the status of the original form will be updated to "Corrected" and it will link the correction with that form.

Corrections process diagram:
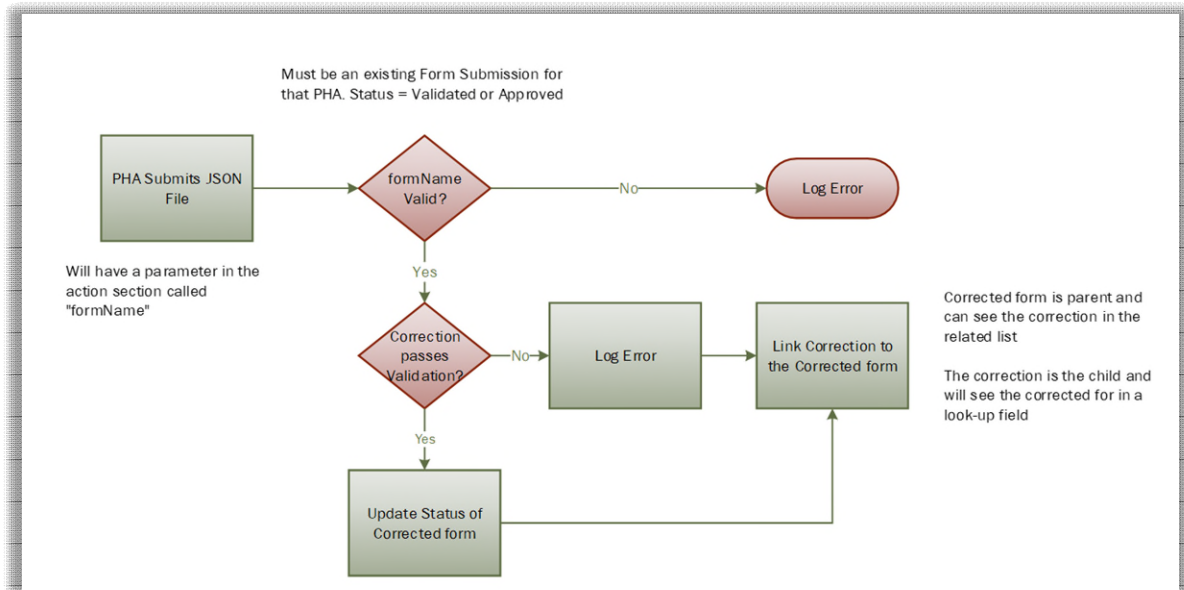

Summary Details:

- If line 2c, Correction, equal Y, then "formName" will be required.
- The form to be corrected must belong to the PHA submitting the correction (the PHA code cannot be corrected).
- If the Head of Household (HOH) SSN is changed, the HOH First Name, Last Name and Date of Birth (DOB) cannot be changed in that submission.
- When a correction is submitted and passes validation, the corrected changes **do not automatically cascade** through subsequent form submissions. For example, if the SSN, name, DOB, income, rent, etc. is changed. Therefore, individual corrections must be submitted for each form where a correction is needed.
- Voids cannot be corrected. If this is attempted, it will receive error code 5458.
- End of Participation cannot be corrected if a subsequent submission exists.
- Portability Move-out cannot be corrected if a subsequent submission exists.
- Line 3w, Former Head of Household SSN, cannot be corrected. If this is attempted, it will receive error code 5515.

- When a correction is submitted, it must pass all validations to take effect. This includes prior submission validations for forms that have an effective date prior to the effective date of the correction. Submissions with effective dates after the effective date of the corrected form will not be re-validated.

9.2 Voids

Users will only be able to void the most recent form submission based on the effective date of the forms in the system. To facilitate this, and to ensure that the correct form is being voided, the form name from within the system will need to be supplied in the "formName" attribute in the JSON file. Voids will need to pass the validation process to successfully void the specified form. If the JSON submission passes validation, the status of the original form will be updated to "Voided". A new form submission will not be created by the system.

Voids process diagram:
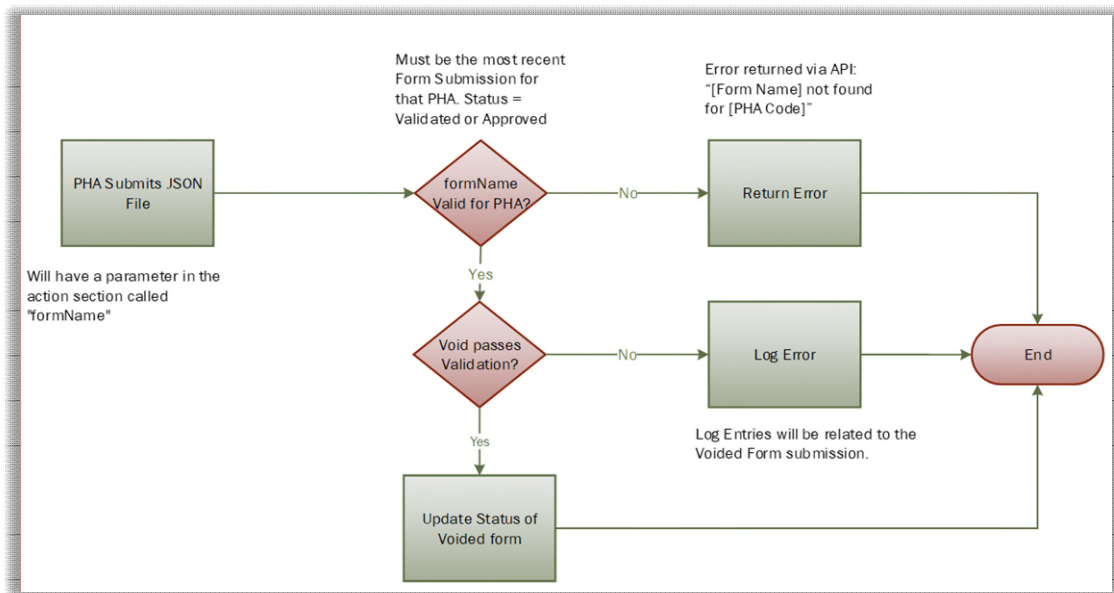

Summary Details:

- If line 2a, Type of action, equal 15, then "formName" will be required as well as the PHA code.
- If the "formName" is not found for the PHA, then an error is returned via the API, or as a message on the Community Portal if submitted in the portal.
- Only the most recent form can be voided, based on the effective date.
- All other existing validations must still be met.
  - If successful, the original form will be updated with a status "Voided".
  - If not successful, the errors will be logged and attached to the original form.

Void Scenarios:

Scenarios	Result
Void Form-00001: Form Not Found for PHA	Error returned via API / Community Portal
Void Form-00002: Form Found for PHA but not the most recent	• Form-00002 not updated • New validation will be logged and associated to Form-00002
Void Form-00003: Form Found for PHA but fails an existing validation	• Form-00003 not updated • Validation(s) will be logged and associated to Form-00003
Void Form-00004: Form Found for PHA no errors	• Form-00004 status updated to "Voided" • Audit Trail on Form-00004 will track why it was voided.

9.3 Sample JSON for Corrections and Voids "formName" Attribute

Note: The action type in the example below is just for this example. If you are submitting a void, it will be 15. If you are submitting a correction to another action type, it will be the action type for that submission.

```
"action": {
"actionType": "1",
"effectiveDate": "11302019",
"isCorrection": "N",
"correctionReason": "",
"formName": "Form-0009032",
"admissionDate": "11302019",
"reexaminationDate": "11302019",
"rentUpdateDate": "",
"isFssParticipant": "N",
"specialProgram": "",
"specialOther1": "",
"specialOther2": "",
"isMtwssParticipant": "N",
"mtwssAdmissionDate": "",
"eopReasons": "",
"interimReexamReasons": ""
},
```

10.0   HUD-50058/HUD-50058 MTW Expansion Line Technical Reference Summary

The tables below provide detailed technical reference information for PHAs and business partners (e.g. vendors) submitting HUD-50058 or HUD-50058 MTW Expansion data to the HIP system. The information provided in the tables below should guide both PHAs and business

partners in the correct submission of data for each line of either the HUD-50058 or HUD-50058 MTW Expansion form and identifies potential errors that may result if the information submitted is either unexpected or incorrect for the specific line.

For the HUD-50058 MTW Expansion, possible MTW flexibilities that may be applied per the MTW Operations Notice are not reflect since each PHA may or may not apply the flexibilities that could be associated with a particular line of the form. To aid in reporting flexibility, error messages will be relaxed to warnings or removed completely. These are noted where it is applicable.

The Tabular Key (below) provides a summary of each of the information fields provided by HUD-50058 or HUD-50058 MTW Expansion form line number (e.g. 2a.) including descriptive information, data type and size information, additional comments, error codes, and JSON reference name and path references.

Tabular Key:

Line Name:	Name of HUD-50058 MTW Expansion Field	
DESCRIPTION	Description of the data provided to HUD in the HUD-50058 and/or HUD-50058 MTW Expansion form field	
TYPE	The data type (e.g. alphanumeric) of the data provided to HUD in the HUD-50058 or HUD-50058 MTW Expansion form field	
SIZE	The number of characters (e.g. each character consumes one space of alphanumeric text) of the data provided to HUD in the HUD-50058 or HUD-50058 MTW Expansion form field	
COMMENTS	Additional descriptive information about the data provided to HUD in the HUD-50058 and/or HUD-50058 MTW Expansion form field. If the flex bucket functionality will be used to relax or remove an error code for a specific submission type and program type, it will be noted here.	
ERROR CODES	Error Code Number	Error language provided to the submitter for the referenced code. The error language indicates the nature of the error which should also assist the submitter in resolving the error.
LINE REFERENCE NO.	Line number reference (e.g. 2a.) for the field on the HUD-50058 or HUD-50058 MTW Expansion form field	
SUBMISSION TYPE	Submission types the line number is a part of	
PROGRAM TYPE	Program types applicable to the line number. For the HUD-50058 program type VO, if it is only applicable to a specific type of voucher program, it will be noted in parenthesis.	

Line Name:	Name of HUD-50058 MTW Expansion Field
ACTION TYPE	Required action types are those that the line number must be included for; optional action types are those that data can be included for. If an action type is only applicable to a specific submission type it will be shown in parenthesis. For example, if it says 1, 2, 3, 4, 7, 12, 14 (50058 only), this means that action type 14 is only applicable to the 50058 submission type.
JSON NAME	The name of the JSON field on the MTWExpansionForm_JsonMapping.xlsx template
JSON PATH	The path for the JSON field on the MTWExpansionForm_JsonMapping.xlsx template

11.0   HUD-50058/HUD-50058 MTW Expansion Line Sections and Fields

11.1 Header

Field Label:	Submission Type
DESCRIPTION	The submission type identifier for the specific HUD-50058 form that is being submitted. Also defines the rule set to validate the data contained in the form submission.
TYPE	Alphanumeric
SIZE	10
COMMENTS	Use 50058 for the HUD-50058 form and MTWEX for the HUD-50058 MTW Expansion form
ERROR CODES	None
LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058, MTWEX
PROGRAM TYPE	50058 – P, VO, MR; MTWEX – P, PR, T, H, LP, and LN
ACTION TYPE	Required for all action types, 14 for submission type 50058 only
JSON NAME	submissionType
JSON PATH	header.submissionType

Field Label:	Identification Code
DESCRIPTION	The identifier generated by the vendor software that uniquely identifies the form submission.
TYPE	Alphanumeric
SIZE	255
COMMENTS	There is no standardized format for identification code. Identification code is not a required value in API submission.
ERROR CODES	None
LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058, MTWEX
PROGRAM TYPE	50058 – P, VO, MR; MTWEX – P, PR, T, H, LP, and LN
ACTION TYPE	Required for all action types, 14 for submission type 50058 only
JSON NAME	identificationCode
JSON PATH	header.identificationCode

Field Label:	Vendor Software ID
DESCRIPTION	A number, letter, or combination of the two to identify the vendor of the software.
TYPE	Alphanumeric
SIZE	100
COMMENTS	Identifier each software vendor may use to identify its product.
ERROR CODES	None
LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058, MTWEX
PROGRAM TYPE	50058 – P, VO, MR; MTWEX – P, PR, T, H, LP, and LN
ACTION TYPE	Required for all action types, 14 for submission type 50058 only
JSON NAME	vendorSoftwareId
JSON PATH	header.vendorSoftwareId

Field Label:	Vendor Software Version
DESCRIPTION	The identifier of the software release and version information.
TYPE	Alphanumeric
SIZE	100
COMMENTS	Used when providing customer support to identify which version of software users have used to record tenant characteristic data.
ERROR CODES	None
LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058, MTWEX
PROGRAM TYPE	50058 – P, VO, MR; MTWEX – P, PR, T, H, LP, and LN
ACTION TYPE	Required for all action types, 14 for submission type 50058 only
JSON NAME	vendorSoftwareVersion
JSON PATH	header.vendorSoftwareVersion

Field Label:	Form Version Date
DESCRIPTION	The OMB approval date of the HUD-50058 or HUD-50058 MTW Expansion form being submitted.
TYPE	Date
SIZE	8
COMMENTS	Use MMDDYYYY format. Provide the date in the footer of the OMB approved form.
ERROR CODES	None
LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058, MTWEX
PROGRAM TYPE	50058 – P, VO, MR; MTWEX – P, PR, T, H, LP, and LN

ACTION TYPE	Required for all action types, 14 for submission type 50058 only	
JSON NAME	realEstateId	
JSON PATH	agency.realEstateId	

Line Name:	Voucher Type
DESCRIPTION	Voucher type
TYPE	Alpha
SIZE	2
COMMENTS	This field is not on the HUD-50058 forms. It has been added in the system for submission type 50058 <u>only</u> to assist in distinguishing the voucher program since program type VO is used for Project-based Vouchers, Tenant-Based Vouchers, and Homeownership Vouchers on the HUD-50058. This also assists in the programming of the validations for each voucher related rent calculation section (11, 12, or 15). This field is **<u>not</u>** required for HUD-50058 MTW Expansion submissions, which uses submission type MTWEX. It is used for HUD-50058 submissions when the program type in line 1c equals VO. Enter 'T' for Tenant-Based Voucher, 'PR' for Project-based Voucher, and 'H' for Homeownership voucher. This is due to the JSON submission format using the same name and path for all three voucher rent calculation sections.

ERROR CODES	3198	FATAL: If the Program type is VO, Voucher Type must be H, T, or PR
	3199	FATAL: If the Program type is not VO, Voucher Type must be blank

LINE REFERENCE NO.	n/a
SUBMISSION TYPE	50058
PROGRAM TYPE	VO
ACTION TYPE	Required for all action types, 14 for submission type 50058 only
JSON NAME	voucherType
JSON PATH	agency.voucherType

11.3 Section 2. Action

Line Name:	Type of Action	
DESCRIPTION	Indicates the reason for submitting a 50058 record for the family.	
TYPE	Numeric	
SIZE	2	
COMMENTS	Use the following codes for each action type. Do not use a zero before single digit numbers. 1 for New Admission 2 for Annual Reexamination for HUD-50058 and Full Reexamination for HUD-50058 MTW Expansion 3 for Interim Reexamination 4 for Portability Move-in (VO only) 5 for Portability Move-out (VO only) 6 for End Participation 7 for Other Change of Unit 8 for FSS Addendum Only for HUD-50058 and FSS/MTW Self-Sufficiency Addendum Only for HUD-50058 MTW Expansion 9 for Annual Reexamination Searching (VO only) 10 for Issuance of Voucher (VO only) 11 for Expiration of Voucher (VO only) 12 for Flat Rent Annual Update (PH only) 13 for Annual HQS Inspection Only (VO only) 14 for Historical Adjustment (submission type 50058 only) 15 for Void Notes: • Type of Action Code '14' for Historical Adjustment has been removed from the HUD-50058 MTW Expansion and will result in a Fatal error if used. • When a family that receives flat rent requires a full reexamination, use Annual Reexamination (2a= 2). • Error 5282 is currently implemented but some work may be done on it in the future. This error was created because action type 5, Portability Move-out, cannot be used for program type PR. Portability Move-out is needed to do a Portability Move-in (action type 4). If a household is received under portability and housed in a PBV unit, a New Admission (action type 1) can be submitted with the applicable information in lines 11d, 11e, and 11f.	
ERROR CODES	3119	FATAL: Action Type is required
	3202	FATAL: If Program equals Project Based Voucher, cannot equal 4, 5, 9, 10, 11 or 12
	3203	FATAL: If Program equals Homeownership Voucher, cannot equal 9, 10, 11, 12 or 13

Line Name:	Type of Action	
	3303	FATAL: Action Type must be numeric and valued as a valid action type for the type of 50058 form being submitted (submission type being submitted)
	4056	FATAL: Action Type cannot equal '4', '5', '9', '10', '11'or '13' when Program is Public Housing
	4058	FATAL: Action Type cannot equal '12' when Program is Tenant-Based Voucher, Project-Based Voucher, or Homeownership Voucher. On the HUD-50058 program type also cannot be Mod Rehab.
	4060	FATAL: Action Type cannot equal '10' or '11' when Program Type is Mod Rehab
	4062	FATAL: If Action Type equals '4', '5', or '9', Program Type must equal Tenant-Based Voucher
	4064	FATAL: Program type is different than program type in current record. EOP required to change program type
	4173	FATAL: A record with a later Effective Date exists for this Head of Household within the same PHA. Therefore, this EOP cannot be processed
	5279	FATAL: Last action submitted for this tenant was Portability Move-Out. Only VOID (from the same PHA), Addendum-Only (from the same PHA), or Portability Move-In (from a different PHA) can be sent. No other actions can be accepted.
	5280	FATAL: A Tenant-Based Voucher or Homeownership Voucher record for this Head of Household in a different PHA does not exist. Portability Move-In cannot be accepted. Use New Admission
	5282	FATAL: Portability Move-In cannot be submitted with a Project Based Voucher.
	5283	FATAL: Portability Move-Out cannot be accepted for a household that currently participates in Project Based Vouchers.
	5338	FATAL: A Tenant-Based Voucher or Homeownership Voucher record for this Head of Household exists which is not an EOP. New Admission cannot be accepted. Use Portability Move-In (4)
	5339	FATAL: A Public Housing record for this Head of Household exists. Portability Move-out cannot be accepted
	5346	FATAL: A non-EOP record for this head of household exists in the system. Issuance of Voucher cannot be accepted
	5347	FATAL: An Issuance of Voucher record for this head of household within the same PHA does not exist. Expiration of Voucher submission cannot be accepted

Line Name:	Type of Action	
	5348	FATAL: The SSN is an active record in another agency and there is no overlapping date situation. Port Out cannot be accepted and is not necessary
	5355	WARNING: In the future, you will no longer be able to submit a record for a new tenancy or move-in unless there is an action code 10 (issuance of voucher) for the family
	5360	WARNING: End of Participation submitted without having an FSS (or MTWSS as applicable) exit report.
	5361	WARNING: Action type is Port-out and no FSS exit report submitted. FSS exit report must be submitted if the family will not continue participation in the initial PHA's FSS program. Do not submit FSS exit report if the family will continue participating in the initial PHA's FSS program per 24 CFR 984.306(c).
	5363	FATAL: Port Out cannot be accepted because Port out already occurred for the combination of SSN and PHA.
	5502	FATAL: Tenant is already ported in to another PHA. Void cannot be processed for the port out.
	5514	FATAL: This Portability Move-out record cannot be processed because an automatic Portability Move-out was processed 60 days after the effective date of the Portability Move-in that caused the overlap in assistance.
	5518	FATAL: Tenant is already ported in to another PHA. Void cannot be processed for the new Admission.
	5519	FATAL: Automatic EOP has already been processed, action 6 EOP is submitted 60 days or more after the effective date of the action 1 new submission.
